

REUSABLE PLASTIC TRAY THEFT

Reusable plastic trays are integral to the distribution of baked goods and the theft of these trays creates significant supply chain disruption. In North America, it is estimated that the food industry's annual reusable plastic tray, crate, and pallet losses.

EXCEED \$500 MILLION PER YEAR

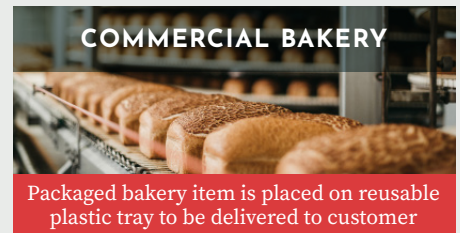

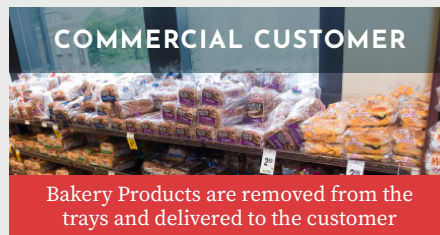

WHY DOES THE BAKING INDUSTRY USE REUSABLE PLASTIC TRAYS?

- ✓ Food Safety
- ✓ Sustainable
- ✓ Cost Effective

LIFE CYCLE OF REUSABLE PLASTIC TRAYS

Given their durability and ease of cleaning, baking companies invest substantially in reusable plastic trays. The loss of reusable plastic trays will result in many negative consequences and inefficiencies for the baking company.

THE THEFT OF THE REUSABLE PLASTIC TRAYS OCCURS IN A FEW DIFFERENT SETTINGS:

- **Criminal organizations** – Organizations that are engaged in illegal regrinding operations
- **Corporate theft** - Some companies try to evade capital expenditure costs by stealing other companies' reusable plastic trays
- **Improper retail use or disposal** – The retailer uses the reusable plastic trays for a different purpose than is intended

Baking companies are serving as model environmental stewards by investing in reusable plastic trays for distribution. Due to the widespread theft of reusable plastic trays from the baking industry's supply chain, we need legislative action to increase the penalties for this crime.
